

Gerrit MultiSite[®]

Enable distributed teams to collaborate as one using Gerrit with no downtime, no disruption.

G

Geographic collaboration

- Near real-time collaboration
- Access to latest code versions
- Repository: one copy equivalence

E

Enhanced availability

- Full multi-primary replication
- High availability
- Minimized downtime
- Reduced client latency

R

Restores data in a disaster

- Built-in disaster recovery
- Synchronized Gerrit copies
- Seamless switching to replicas
- Automatic self-healing after server outages

R

Regulatory compliant data locality

- Simple and easy selective replication
- You choose where your repositories reside

I

Integrity with compliance and governance

- Ensures data integrity
- Meets regulatory requirements
- Fully replicated repositories

T

Transformative scalability

- Easily scale up and down as your global engineering demands change.
- Horizontally scale locally to meet high-load demands.
- Distributed workloads
